Welcome to the Labor Techtronics Assembly Team!

We provide contract electronic Printed Circuit Board (PCB) assembly to include final manufacturing as required. Our equipment is state of the art utilizing both technical know how, with the computer advantage. Our programming and placement costs are very competitive.

Your PCB is safe in our ESD hands. Our quality standards yield success rates as high as 98.9%. We provide sample percentage testing as well as 100% testing services for our clients. Initial visual inspection sets us apart from our competition. No cold solder joints here!

Our new production line is quick to program and handles large volumes with ease.

### Customer Testimonials:

"Morris and the entire staff at LTA have been providing outstanding service to us for over 5 years. The accuracy on the LTA board assemblies is near 100% and the boards are always delivered when promised."

"Texas Instruments and I would like to thank you for your outstanding efforts..."

"I'm grateful that I found them."

"Their attention to detail saved hundreds of dollars in rework by offering unique prototype services."

"...with LTA at least you know the assembly process is sound

"...highest quality assurance program while maintaining a very competitive price by far."

[www.LTAINC.com](http://www.LTAINC.com)

Cutting traces and running wires and replacing parts are all skills we perform.

LTA Inc. was established in 1998 and has earned high remarks with its many satisfied customers.

### Prototyping / Production

Proto-type and production assemblies are produced on separate processes but using the same assets enabling a smooth transition from the first article to high volume production. Proto-type services include but are not limited to:

- 24 hour turnaround time is available for proto-type assemblies.
- Engineering/re-engineering support.
- Special sample or test runs available (Single or low quantity orders).
- ESD safe inspection in accordance with MIL-I-45208 and IPC-A-610

### Rework and Revisions

LTA Inc. understands that rapid changes in the technology world means Engineering Change Orders (ECOs), Manufacturing Change Orders (MCOs), out of date assemblies, multi-function units and so on...nothing new here! Our rework and revision services include:

- Removal/Replacement of defective components.
- Circuitry modifications (trace cutting, wiring, rewiring).
- Full Board reflow of cold solder
